

Shown is the function $y = f(x)$.

1 Complete the table below

Function	First Transformation	Second Transformation
$y = 2 - f(x)$		
$y = f(x - 1) + 1$		
$y = -f(2x)$		
$y = -3f(-x)$		

Shown is the function $y = f(x)$.

2 Complete the table below

Function	First Transformation	Second Transformation
$y = 1 - f(x)$		
$y = -2f(x-1)$		
$y = \frac{1}{2}f(-x)$		
$y = 5 + f(-x)$
